

Investor Services Agreement

MarketRiders, Inc. ("we" or "us") agrees to provide investment advisory and related services to you through the marketriders.com online advisory service (the "Service"). You acknowledge that you have reviewed and agree to the terms of this agreement, which includes our Disclosure Statement on Form ADV, Part II as well as the Terms of Service.

The Service.

The Service is an Internet-based investment advisory service that uses the information you provide to allow us to generate a customized investment portfolio meeting your specific investment goals. The Service provides:

- Advice on allocating your investments to meet your specific investment goals
- Tracking the performance of your portfolio
- Monitoring your portfolio and alerting you when it needs to be rebalanced
- Advice on how to rebalance the portfolio

In addition, as part of the Service we also provide a "coaching" service pursuant to which one of our registered investment advisers will assist you in a personalized manner in setting up an account and using the Service.

Investment Allocation Recommendation.

The "Advisor" portion of the Service will use the information that you provide to allow us to generate a customized investment portfolio, which is allocated based on your age, years until you need your invested capital, risk tolerance and investment experience. The recommendation will consist of a list of Exchange Traded Funds, or ETFs, that we recommend for your portfolio and the allocations among these ETFs in which we suggest you should invest.

Investment Implementation.

If you decide to implement the Service's recommendations, you can go to a traditional brokerage company, such as Charles Schwab, or set up an online brokerage account to implement the suggested portfolio. Once you have opened an account, you would buy the various ETFs in the recommended allocation levels provided to you.

Ongoing Ability to Track.

Once you have implemented the portfolio by buying the ETFs, you can track your portfolio's financial performance by inputting the actual ETFs and prices you paid for them in the Service. As long as you subscribe to the Service, you may use the Service as often as you like to track your portfolio's progress. The Service updates the prices of the underlying ETFs on a daily basis.

Rebalancing Asset Classes

As long as you subscribe to the Service, we will monitor your portfolio's performance and alert you when the portfolio needs to be rebalanced. If it does, we will advise you via email of the changes that we recommend should be made to the allocations in your portfolio. You may then choose to make the changes with your brokerage account and input in the Service the relevant information necessary for us to track your portfolio's performance.

Your responsibilities.

You agree to use the Service according to this agreement and the Terms of Service. If you do not comply with the terms of this agreement, you will hold us harmless from any loss. You agree to use the Service for your personal use only and not for commercial or business purposes.

The Service is an assistant to be used in your investment planning. It is not a substitute for your own informed judgment. You are responsible for your own investment decisions. You may accept, reject or modify the investment recommendations the Service provides you from time to time.

You agree to provide complete and accurate information and to update your information when your investments or your personal or financial circumstances change. You consent to the transmission of your personal information to us by you.

Fees.

You will be required to pay us either a monthly fee of \$14.95, a quarterly fee of \$44.95, or an annual fee of \$149.95, paid in advance, for use of the Service. This will entitle you to full use of the software on our site. In the event you terminate use of the Service, fees that are charged in advance will be refunded at the Client's request, based on the prorated amount of work completed at the point of termination.
